

## NOMINEES

**Company: Posi Lock Puller Inc.**  
**Product: Grease Gun Applicator System**

Posi Lock's new Grease Gun Applicator System makes lubricating quick and easy. The kit can be installed with standard tools, on most electric DC voltage grease guns in a matter of minutes. The ergonomically engineered adjustable speed belt will hold the grease gun safely at your side, while the extra long 5' hose features a revolutionary thumb activated Micro Switch at the grease coupler to provide easy application of lubricant where you need it. The smart design frees trigger hand while greasing, leaving one hand free for mobility and safety in dangerous, hard-to-reach or confined spaces.

**Company: Techno Tools Corp.**  
**Product: B500IR**

The B500IR consists of Techno Tools Corp.'s patented battery, charging/starting system tester model B500 and the new Infrared to USB Adapter, model B501. The B500 tests all 6V/12V batteries individually/parallel/series. It displays the battery condition in percent/capacity, CCA, charge state, and good/replacement status. It tests 6V, 12V, 24V and 36V starter/charging systems, starter draw, alternator/regulator output including diode ripple. A four language LCD display is featured. Data is stored for reference and includes custom identification. It can be used with all infrared wireless printers, and the B501. The B501 USB Adapter transfers data in the B500 using a notebook or PC computer. Just install the Windows program and connect the USB cable to the computer. Print or store the data. Printout can be attached to paperwork to support the service. The B500IR is supplied in a robust carrying case with instructions for use, the installation CD and a two-year warranty.
